- <https://www.linkedin.com/in/devops-mit-amit>

Nationality: Indian

Language: English C1, German A2

ABOUT ME

DevOps Engineer with 6 years across two Fraunhofer institutes, specializing in CI/CD, Linux infrastructure, and automation at scale. Experienced in GitLab CI/CD, Jenkins, Terraform, HashiCorp Vault, observability, and troubleshooting across distributed systems supporting 140+ engineers. Experienced in incident response and platform reliability.

TECHNICAL SKILLS

Core technologies: Kubernetes · GitLab CI/CD · Jenkins · Terraform · Ansible · HashiCorp Vault · Linux · Grafana · OpenSearch · PostgreSQL · MongoDB · ArgoCD · Docker

Languages & scripting: Python, Bash, Groovy

CI/CD, SCM & artifacts: Jenkins, GitLab CI/CD, ArgoCD, Git, Harbor, Artifactory, Dependency-Track

Linux & networking: Linux (Ubuntu/Debian/RHEL), systemd, DNS, TCP/IP, TLS certificates, performance & connectivity debugging

Observability & incident response: Grafana, OpenSearch (ELK-compatible), dashboards, runbooks, structured triage

Databases & data platforms: PostgreSQL, MongoDB, CephFS, S3

Containers, IaC & secrets: Kubernetes, Docker, HashiCorp Nomad, Helm, Terraform, Puppet, HashiCorp Vault, SBOM/SLSA

Cloud & virtualization: GCP, OpenStack, Proxmox, VMware, Windows Server

WORK EXPERIENCE

Jan 2024 – Present

DevOps Engineer (full-time)

Fraunhofer-Institut für Digitale Medizin (MEVIS), Bremen

- **Currently leading a domain migration across 100+ Linux and Windows nodes**, changing IP, routing, DNS, TLS, Puppet, GitLab, and container registry **with low-to-zero downtime**; also debugged the **PostgreSQL backends** behind **Dependency-Track** and **Harbor (~4 TB registry data)** during the migration.
- Automated **TLS certificate issuance and auto-renewal** via **HashiCorp Vault** and **CI/CD workflows** (one-click renewal) across production services.
- Designed centralized **GitLab CI/CD pipeline templates** and **Jenkins pipelines**, **reduced critical pipeline runtime from 15 minutes to 30 seconds**.
- Operated **Harbor, Artifactory, and Dependency-Track**, standardized **deployment approvals, rollback procedures (VM/DB snapshots, pre-rollout backups)**, **staging promotion**, and **SBOM/SLSA generation** across teams.

- **Reduced VM provisioning time from 2 days to 2 minutes** — automated 100+ Linux/Windows VMs across OpenStack, Proxmox, and VMware with **Terraform, Ansible, and Puppet** (15 high-performance nodes).
- Built monitoring dashboards in **Grafana** and **OpenSearch (ELK-compatible)** and wrote runbooks for deployments and major changes — supporting platform reliability and incident response.
- Architected automated backup and recovery for **~10 TB of production data** — deduplicated, retention-tiered, restoring within minutes.

Sept 2020 – Dec 2023

DevOps Engineer (Wissenschaftliche Hilfskraft — Energiewirtschaft Prozessintegration)

Fraunhofer-Institut für Energiewirtschaft und Energiesystemtechnik (IEE), Kassel

- Modernized legacy **SVN + manual-release** workflows into one-click **Jenkins / GitLab CI/CD** deployments via **Rancher** and **ArgoCD** — designed and maintained **40 standardized pipelines** for two development teams, running applications in **separate staging/production namespaces on dedicated staging and production Kubernetes clusters**. Build time **1 hour → 15 minutes**.
- Built and operated a self-hosted **developer platform** across **build, test, and production environments** — supporting **25 developers and scientists** with CI/CD, artifact management, ML infrastructure, and automated development environments.
- Introduced automated **quality gates** by deploying **SonarQube** across CI/CD pipelines and local IDEs — improving code coverage and reducing technical debt across all maintained projects.

EDUCATION AND TRAINING

Oct 2019 – June 2023

M.Sc. in Computer Science

Paderborn University, Paderborn

Thesis: Empirical Evaluation of Forward and Backward Static Taint Analysis.
Specialization: Software Engineering and Security.

Aug 2015 – June 2019

Bachelor of Engineering in Computer Science and Engineering

Chandigarh University, Mohali, India

ADDITIONAL INFORMATION

Courses

Automating Supply Chain Security — The Linux Foundation. SBOM generation and SLSA compliance.

Understanding the EU Cyber Resilience Act (CRA) — risk mitigation, legal compliance, and supply-chain resilience under EU standards.

Workshops

Scrum Training — MeVis Medical Solutions AG.

Clean Code — Ferber-Software GmbH.

Lego4Scrum — S&N Invent GmbH.
